19 June 2014

Attention: Mr. Konah D. Karmo

Dear Mr. Karmo

5TH EITI REPORT FOR LIBERIA
FOR THE FINANCIAL YEAR 1 JULY 2011 TO 30 JUNE 2012

We are pleased to present the 5th EITI Report for Liberia reconciling the contributions of the extractive industry to the economy of Liberia as reported by the extractive industry companies to reports by the Government of Liberia Agencies.

The report provides a brief background, scope and objectives, our methodology and approach to the reconciliation. It then provides details of our findings, recommendations for improvement and way forward for the reconciliation process.

We appreciate this opportunity to work with you and are most grateful for the assistance provided to us during the compilation of this Report.

Yours sincerely,

Victor Gborglah
PARTNER
For and on behalf of Ernst & Young

Sam Monbo
DIRECTOR
For and on behalf of MGI Monbo & Co.

Executive Summary

Executive Summary

Introduction

The objective of the 5th EITI Report for Liberia is to reconcile revenue from all extractive companies and to track the use of that revenue by the Government of Liberia where possible. The Report covers the fiscal year from 1 July 2011 to 30 June 2012 and is broken down into the following main areas:

- ◆ Footprint of the extractive sector and general observations
- ◆ Fixed amounts due reconciliation
- ◆ Amount paid reconciliation
- ◆ Revenue tracking
- ◆ In-kind contribution

The scope for the 4th Report was largely maintained with a number of additions made, including:

- ◆ The submission of an inception report;
- ◆ Reporting on the level of compliance to specific EITI Standards.

We commenced the 5th Report with a two day workshop to take stakeholders through the reconciliation requirements and set dates for submission of templates. Companies and Agencies then submitted their templates at the LEITI Secretariat which we obtained for reconciliation. For ease of comparison all amounts in Liberian Dollars were converted to US Dollar at a rate of LD72.87 to US\$1.

Executive Summary

The extractive industry contributed 14% to total GDP of the Liberian economy in the 2011/2012 fiscal year. This is shown in table 1 below:

Table 1: Contribution of extractive sector to GDP

Sector	Agriculture	Forestry	Mining	Oil	Total	Real GDP*
Contribution per 5 th Report	28.00	11.11	56.96	14.07	110.14	801.55**
% of GDP	4%	1%	7%	2%	14%	

*Source: Central Bank of Liberia – Annual Report 2012

**We computed a simple average of GDP for 2011 and 2012 in order to compare with extractive industry contributions for 2011/2012 fiscal year.

Apart from the contribution to GDP, the extractive companies, collectively, are also present in fifteen (15) counties in Liberia. County presence per sector is shown in table 2 below:

Table 2: Presence of extractive sector per county

No.	County	Agriculture	Forestry	Mining*	Oil
1	Bomi	✓		✓	
2	Bong	✓		✓

	Total	10	11	14	3

Executive Summary

Only fourteen (14) companies submitted data on employment, export and total revenue upon our request. A summary of their response per sector is shown in table 3 below while details are found in table 11. This information was directly obtained from the companies without any form of verification or validation by the reconciler.

Table 3: Summary of employment, export and revenue data from the companies

Sector	Areas/region of production	Total employees	Total Liberia employees	Value of total exports	Total revenue - 2011/2012
Agriculture	Maryland, Margibi, Grand Bassa, Yanquelol, Bomi	16,413	16,333	234.030,083	242,895,779
Forestry		-	-	-	-
Mining	Grand Bassa, Bong, Nimba, Grand Gedeh, Bomi, Mano River, Grand Cape	377	341 and 30 contractors	-	-
Oil	Montserrado	246	222	-	-

We further went to the Ministry of Labour to obtain information on employment statistics in the extractive industry in Liberia. However, we were only provided with employment data for Agriculture and Mining sectors. Table 4 below shows the level of employment in the Agriculture and Mining sectors as obtained from the Ministry of Labour.

Table 4: Employment in extractive industries

Sector	Employment*	% of total employment
Agriculture, forestry, fishing	524,286	47%
Mining & quarrying	17,545	2%
Others	564,535	51%
Total employment in Liberia	1,106,366	100%

*Source: Ministry of Labour

**We computed a simple average of employment for 2011 and 2012 in order to report for 2011/2012 fiscal year.

There was an increase in the total number of companies considered from 111 in the 4th Report to 148 in the current report, increasing by 33%.

Eighty (80) out of the one hundred and forty-eight (148) extractive Companies submitted templates for the reconciliation for the 2011/2012 financial year. This represents a 54% submission rate. The rate of submission of templates within each sector is shown in table 5 and graph 1 below.

Payments from individual Small Scale Miners and Pit Sawyers were below the reconciliation threshold and therefore templates were not obtained directly from them. Instead, the total receipts, amounting to US\$756,950 for Small scale miners and US\$68,179 for pit sawyers (mainly from chainsaw lumber fees and

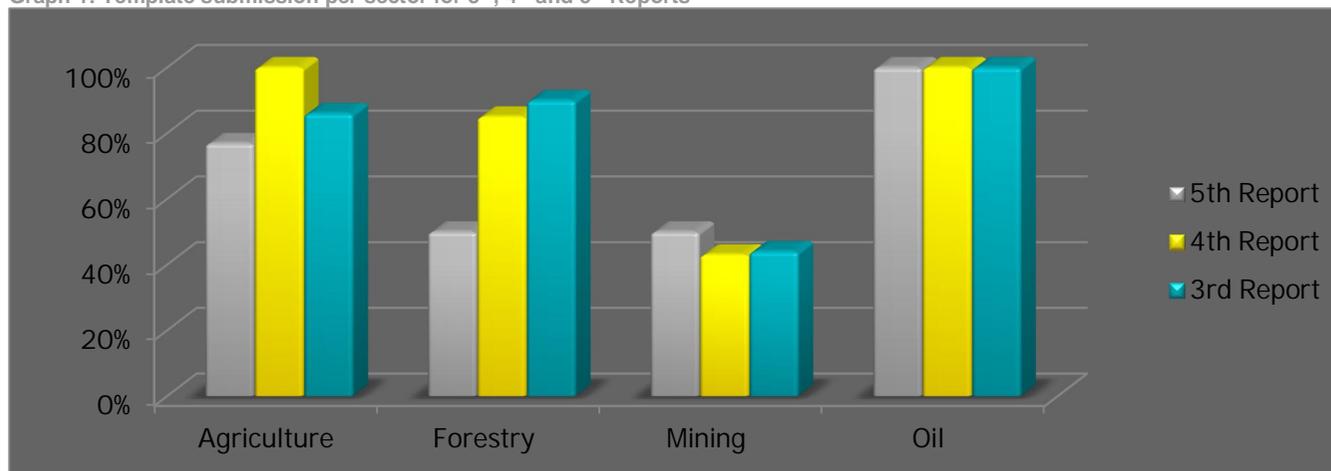

Executive Summary

export collections) were consolidated and presented by the Ministry of Finance and the FDA respectively. These amounts were therefore not reconciled in the Report. The category of licenses to small scale miners and their respective payments are shown in appendix A.

Table 5 - Template submission per sector for 2011/2012, 2010/2011 and 2009/2010

Year	2011/2012			2010/2011			2009/2010		
Sector	Total	Submitted	Rate	Total	Submitted	Rate	Total	Submitted	Rate
Agriculture	13	10	77%	11	11	100%	14	12	86%
Forestry	28	14	50%	20	17	85%	21	19	90%
Mining	102	51	50%	75	32	43%	78	34	44%
Oil	5	5	100%	5	5	100%	6	6	100%
Total	148	80	54%	111	65	59%	119	71	60%

Graph 1: Template submission per sector for 3rd, 4th and 5th Reports

Apart from the Mining sector which saw an increase in the submission rate to 50% from 43% in the 4th report and 44% in the 3rd report, Forestry and Agriculture sectors experienced a drop in their submission rates. The Oil sector has over the last three reporting periods maintained a 100% submission rate.

The forestry sector has seen a consistent drop in submission rate from the 3rd report. The rate of submission in the 3rd report was 90%, 80% in the 4th report and 50% in the 5th report. The decreased rate of submission is due to increased number of participating companies and a number of companies that are below the sector threshold thus not required to submit templates.

Executive Summary

The Agriculture sector however seems unstable with large increases in the 4th reporting period (100%) from the 3rd (86%) and a subsequent decline in the 5th (77%). It should however be noted that the three (3) companies that did not submit templates in the Agriculture sector are considered by LEITI as registered businesses that do not engage in direct extractive activities. Template submission is therefore not a mandatory requirement for them.

Nine (9) Agencies namely Environmental Protection Agency (EPA), Forestry Development Authority (FDA), Liberia Civil Aviation Authority (LCAA), Liberia Maritime Authority (LMA), Ministry of Agriculture (MOA), Ministry of Finance (MoF), Ministry of Lands, Mines and Energy (MLME), National Oil Company of Liberia (NOCAL), and National Port Authority (NPA) submitted templates for the 2011/2012 report as against seven (7) that is, MoF, MLME, NOCAL, FDA, NPA, EPA and LMA in 2010/2011. The increased participation is due to increased publicity of the reconciliation process by LEITI and greater awareness amongst Agencies of their roles.

Executive Summary

Amount Due

The scope of this section is a full compilation, reconciliation and where appropriate, audit of amount due of all fixed components for the agriculture, forestry, oil and mining sectors.

Apart from sector specific taxes within the four sectors which were considered, our work also focused on a few non sector specific fixed taxes. These are as follows:

Table 6: Non sector specific taxes considered

Fee	Category	Comment
Signature fee / signing bonus	Fixed	Applicable if stated in contract
Contribution via GOL to University Depts. (UL etc.)	Fixed	Applicable if stated in contract
Annual Social Contribution (County & Community)	Fixed	Applicable if stated in contract
Business administration fee	Fixed	Applicable
Article of incorporation	Fixed	Applicable (for newly incorporated companies)
Operational / Professional License	Fixed	Applicable

From our review, the fixed components of amounts due to be paid by companies to the government for the fiscal year 2011/2012 amounted to US\$31,588,894.

The Companies however disclosed US\$33,030,421 as the amounts due while the Agencies disclosed US\$17,627,411. We did not disclose the amounts for the agriculture sector since all the tax components are variable. The total amount paid by the companies is US\$50,753,827. This amount is largely driven by a US\$25m payment made by Western Cluster in the 2011/2012 fiscal year for Signature fee/signing bonus.

Total amounts due is shown on a sectorial basis in table 7 below with comparative actual amounts paid:

Table 7: Total amount due

	Amount Disclosed by Company		Amount Disclosed by Agency		Reconciler Computed Amount		Amount Paid		Over/(Under) Payment	
	A		B		C		D		E=D-C	
	US\$		US\$		US\$		US\$		US\$	
Agricultural Sector	-		-		-		-		-	
Forestry Sector	30,995		1,377,034		13,216,145		1,991,311		(11,224,834)	
Mining Sector	27,549,499		16,250,376		12,518,068		40,720,969		28,202,902	
Oil Sector	5,449,927		-		5,854,681		8,041,547		2,186,866	
Total	33,030,421		17,627,411		31,588,894		50,753,827		19,164,934	

The large differences between amounts due disclosed by the Companies and those of Agencies mainly resulted because some tax codes were classified differently by Companies and Agencies. Also amounts due were completely omitted by some Companies as well as Agencies.

Executive Summary

Amount paid

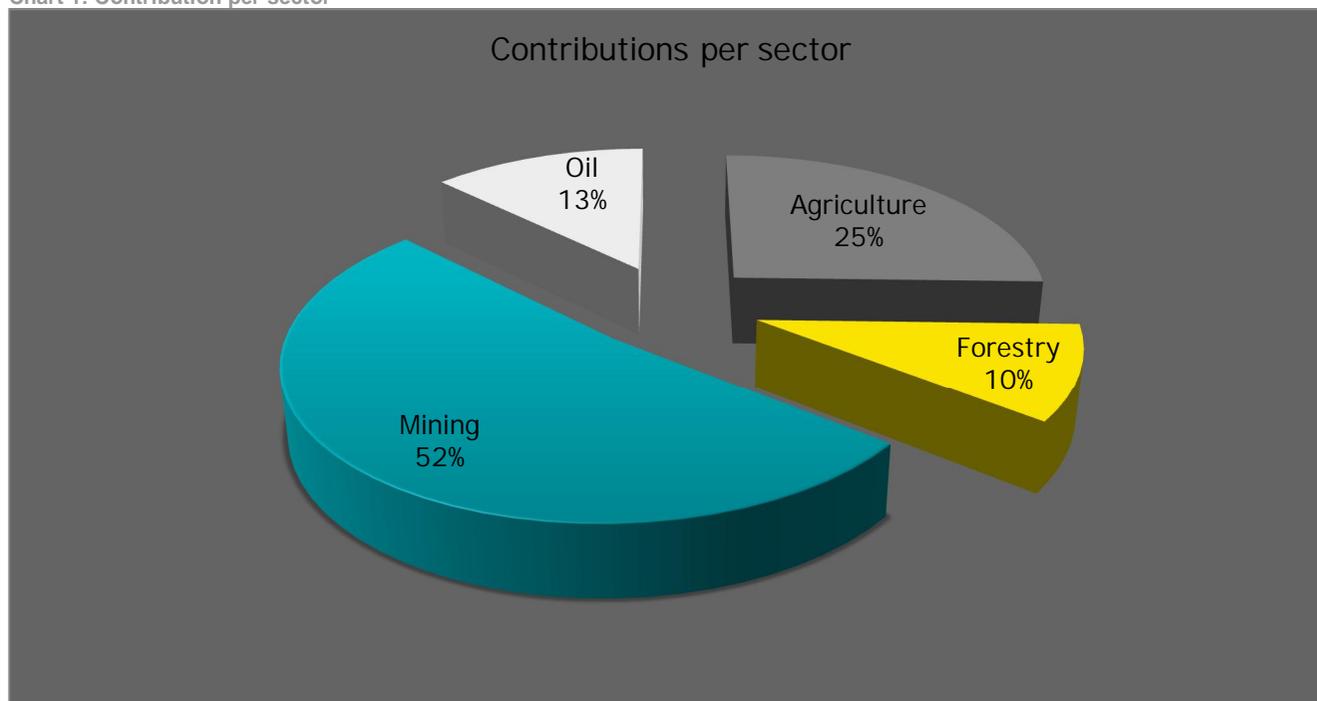

The total amount received by the Government of Liberia from the extractive industry amounted to US\$110,146,657. This is a 7% increase in total receipts from extractive companies, compared to the 4th Report after a US\$15m double count in the 4th report has been adjusted for. While payments from the Agriculture, Forestry and Mining sectors increased by 53% and 98% and 29% respectively, those from the Oil sector dropped by about 72%. The significant reduction in contributions from the oil sector may be due to the one-off payments made in prior year for the acquisition of Oranto by Chevron as well as withholding taxes recorded for Chevron in prior year. Payments for the 5th report are analyzed per sector in table 8 and chart 2 below.

Table 8: Total payments and differences per sector

Sector	Company A	Agency B	Difference C=B-A
	US\$	US\$	US\$
Companies within threshold limit			
Agriculture	27,217,903	28,003,258	785,356
Forestry	6,068,118	6,479,413	411,295
Mining	52,916,515	53,663,278	746,763
Oil	14,081,504	14,063,484	(18,020)
Subtotal	100,284,040	102,209,433	1,925,394
Companies below the threshold limit			
Agriculture			
Forestry	4,513	-	(4,513)
Mining	457,536	1,131,886	674,350
Oil	8,411	8,411	-
Subtotal	470,460	1,140,297	669,837
Companies not in LEITI database			
Agriculture			-
Forestry	-	4,630,622	4,630,622
Mining	55,320	2,166,304	2,110,984
Oil	-	-	-
Subtotal	55,320	6,796,926	6,741,606
Grand total	100,809,819	110,146,657	9,336,838

Executive Summary

Chart 1: Contribution per sector

Of the total amount of US\$110,146,657 received by the Government of Liberia between 1 July 2011 and 30 June 2012, a net difference of US\$9,336,838 (8%) remained unreconciled. This amount is made up of US\$825,129 unreconciled small scale miners and pit sawyers, US\$87,113 for companies below the threshold and US\$6,741,606 unreconciled difference for companies not in LEITI database or registered businesses not directly involved in extractive activities. However, a net difference of US\$1,925,394 (2%) of the total receipts from companies within the threshold remained unreconciled.

Apart from this difference nothing has come to our attention not to confirm the fact that the data is complete in relation to the total corporate presence in the relevant sectors and the integrity of the report can be assured with respect to "amounts paid".

Executive Summary

Other Agencies, apart from the MoF, received a total amount of US\$1,873,564 from extractive companies in the year under review. These receipts were not reconciled since the Agencies do not issue flag receipts upon receiving funds. Amount received by other Agencies per their sector of operation is shown in table 9 below:

Table 9: Summary of receipts by other Agencies

Name of Agency	Amount US\$
EPA	138,100
NPA	508,937
LCAA	27,150
LTA	26,353
APM Terminals	245,023
LMA	125,600
Bureau of Immigration and Naturalization	2,355
University of Liberia	400,000
Liberia Domestic Airport Agency	44,141
Liberia Electricity Corp	2,372
Monrovia City Corporation	170,000
Redemption Hospital	175,000
Liberia Telecommunication Authority	8,533
Total	1,873,564

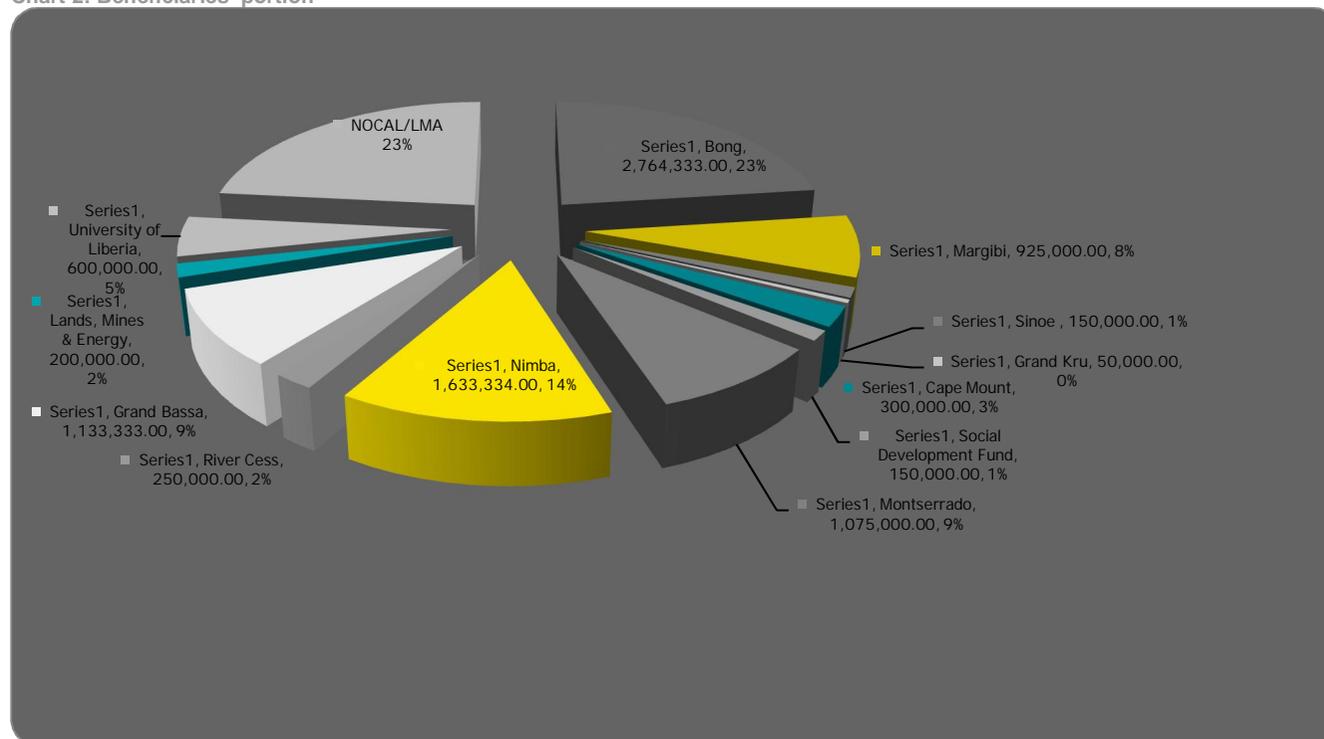

Executive Summary

Revenue Tracking

Revenue tracking focused on tracing earmarked payments from Companies to the Government Agencies as well as disbursements from the Agencies to beneficiary institutions and counties. We could not trace general or non-specific contributions by the Companies to any beneficiary since these non-specific payments go into the consolidated fund where they lose their identity.

An amount of US\$18,755,710 was reported as paid by the Companies to the various Agencies. The Agencies however reported receiving US\$18,944,946. The difference of US\$189,236 arose because, while NOCAL reported a payment of 1,160,764, the MoF reported receiving US\$1,350,000. Of the total amount received, a sum of US\$16,611,667 was disbursed, leaving a balance of US\$2,333,279. Contributions to Revenue Tracking for the 5th Report per company is shown in chart 2 below.

Chart 2: Beneficiaries' portion

Executive Summary

In-kind contribution

The extractive companies were required to disclose in-kind contributions and corporate social responsibilities that they have been engaged in during the 2011/2012 fiscal year. The companies were also required to disclose the estimated dollar value of such contributions on the templates submitted. However, the MSG at its last meeting, held on May 28, 2014, reached an agreement not to include such amounts in the report as they are not being verified as part of this exercise and therefore cannot be authenticated.

The table below shows companies that submitted information on in-kind contribution for this report.

Table 10: In-kind contribution per company

Name of Company
Sime Darby Plantation (Liberia) Inc
Golden Veroleum (Liberia) Inc
Firestone (Liberia) Inc
Bargor & Bargor Enterprises Inc
Chevron (Liberia) Inc
Peppercoast Petroleum
Bukon Jedeh Resources
African Gold Mining (Liberia) Ltd
Hummingbird Resources
West African Resources Corp. (Liberia) Limited
Tietto Minerals Liberia Limited
Arcelormittal Liberia Ltd
Putu Iron Ore Company
China Union Investment (Liberia) Bong Mines Co. Ltd
BHP Billiton

Executive Summary

Challenges

- ▶ Reporting amount due continues to be a challenge for both the Companies and Agencies. Agencies continue to reproduce what the companies stated instead of determining the amount themselves for companies to pay.
- ▶ High level of bureaucracy in public institutions made it difficult to access information quickly.
- ▶ Improper completion of templates by both Companies and Agencies.
- ▶ The lack of a comprehensive database of extractive companies from LEITI.
- ▶ Lack of coordination amount government Agencies.

Way forward and recommendation

- ▶ A production audit across all sectors is required to help determine amounts that ought to be paid so that collection is improved.
- ▶ Sanctions must be brought against companies that did not submit templates and those that submitted without the required attestations and sign-offs.
- ▶ Companies participating in the exercise should always adhere to the instructions and guidance provided by the reconciler at the workshop that precedes the submission of information.
- ▶ Common reporting software should be developed and made accessible to all Agencies and LEITI so that information can be assessed at all times by all authorized stakeholders.

Follow up on previous recommendations (2010/2011)

Out of ten (10) recommendations followed up, four (4) were fully implemented, three (3) were partially implemented and the remaining three (3) not implemented.

Background, Objectives, Scope,
Methodology and Materiality Threshold

Background, Objectives, Scope, Methodology and Materiality Threshold

Background

The Liberia Extractive Industries Transparency Initiative (LEITI) is a tripartite partnership, referred to as the Multi-stakeholders Steering Group (MSG) and consists of representatives of the Government of Liberia, civil society organizations, the private sector and Liberia's development partners. It was established on 10 July 2009 by the Government of Liberia in collaboration with civil societies and extractive Companies.

The mandate of the LEITI consists of regular disclosure, audit/reconciliation, publication and broad dissemination of:

- i. all material payments made by oil, mining, agriculture and forestry sectors to the Government, and
- ii. all material revenues received by the Government from the above-mentioned sectors.

Objectives

The general objective of LEITI is to assist in ensuring that all benefits due the Government and people of Liberia on account, of the exploitation and/or extraction of the country's minerals and other resources are;

- i. verifiably paid or provided;
- ii. duly accounted for; and
- iii. prudently utilized for the benefits of all Liberians and on the basis of equity and sustainability.

To enable it meet the above objectives, the Government of Liberia made funds available through a budgetary appropriation to appoint an Independent auditing firm to prepare the 5th EITI Report for Liberia.

The process aimed to audit and reconcile data provided by all mining, oil, agriculture and forestry Companies as well as brokers and dealers operating in Liberia, and tax receipts from these Companies confirmed by the Ministry of Finance and all other relevant Agencies of the Government of Liberia. Additionally, the assignment also tracked the use of revenues from the extractive sectors by the Government of Liberia.

Background, Objectives, Scope, Methodology and Materiality Threshold

Economic footprint of extractive companies

As part of our procedures we sought to trace the economic footprint of the extractive industry to determine the value they create to the people of Liberia in their operations and interactions within the various communities and the country as a whole. We assessed the extractive industries' contribution to the GDP of the country as well as in key areas such as their proportion of total exports, contribution to total employment and their regions of operation.

i. Size of extractive industry to total GDP

Estimated (Real) GDP for Liberia for the 2011/2012 fiscal year was given as US\$801.55 million, according to the Central Bank of Liberia - Annual Report for 2012. Results from our work showed that the extractive sector as a whole contributed a total of about US\$110.14 million in the year under review, to the Ministry of Finance. This translates to 14% of the GDP of Liberia. Considered per sector, the Ministry of Finance reported receiving US\$56.96m from the Mining sector and US\$28.00m, US\$14.07m and US\$11.11m from the Agriculture, Oil and Forestry sectors respectively. In relation to the GDP for the country, the Mining and Agriculture sectors contributed 7% and 4% respectively, while the Oil and Forestry sectors contributed 2% and 1% respectively. Further detail of the contribution to GDP by the various sectors of Liberia's extractive industry is shown in table 11a below:

Table 11a: Contribution to GDP

	Jan-Dec 2011	Jan-Dec 2012	Average	LEITI Results	% contribution
Sector	A	B	C=(A+B)/2		
Agriculture & Fisheries	222.00	226.20	224.10	28.00	12%
Forestry	88.90	91.10	90.00	11.11	12%
Mining	30.10	69.10	49.60	56.96	115%
Manufacturing	57.70	59.50	58.60	-	0%
Services	369.30	389.20	379.25	-	0%
Oil	-	-	-	14.07	100%
Real GDP	768.00	835.10	801.55	110.14	14%
<i>Note:</i> In order to compare the data to the 2011/2012 fiscal year we averaged the 2011 and 2012 yearly amounts					
<i>Source:</i> Central Bank of Liberia - Annual Report 2012					

Background, Objectives, Scope, Methodology and Materiality Threshold

ii. Contribution to export

The extractive industry contributed 87% of the total export value of Liberia during the 2011/2012 financial year. This amounted to US\$547,057 out of total export value of US\$625,817. Details are shown in table 11b below.

Table 11b: Sector contribution to exports

Sector/commodity	US\$000	% contribution

Detailed monthly export data on gold and diamond from 2007 to 2012 is attached in appendix I.

Background, Objectives, Scope, Methodology and Materiality Threshold

iv. Employment in the extractive industries

We contacted the Bureau of Statistics of the Ministry of Labour, which provided us employment data for the country. Their data included all sectors of the economy and combined agriculture, forestry and fishing as one as well as mining and quarrying. This is shown in table 12 below.

Table 12: Employment in the extractive sector

Sector	Employment	% of total employment
Agriculture, forestry, fishing	524,286	47%
Mining & quarrying	17,545	2%
Others	564,535	51%
Total employment in Liberia	1,106,366	

**Source: Ministry of Labour*

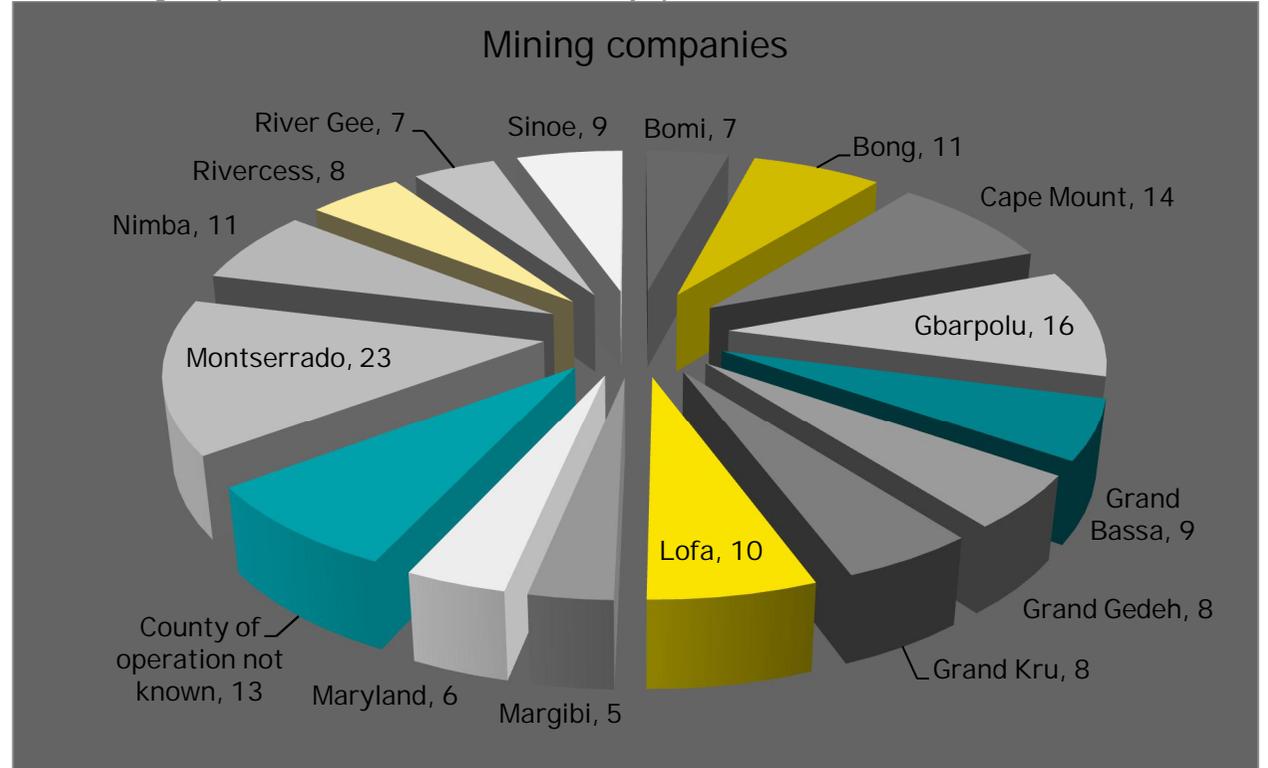

***We computed a simple average of employment for 2011 and 2012 in order to report for 2011/2012 fiscal year.*

Background, Objectives, Scope, Methodology and Materiality Threshold

v. Key areas where production is concentrated

Mining companies appeared to be present in fourteen (14) counties across Liberia. They are followed by the Forestry companies in eleven (11) and Agriculture companies in ten (10) counties. The Oil sector is represented in only three (3) counties in Liberia. The four sectors and the counties within which they operate are shown in charts 3 to 6 below.

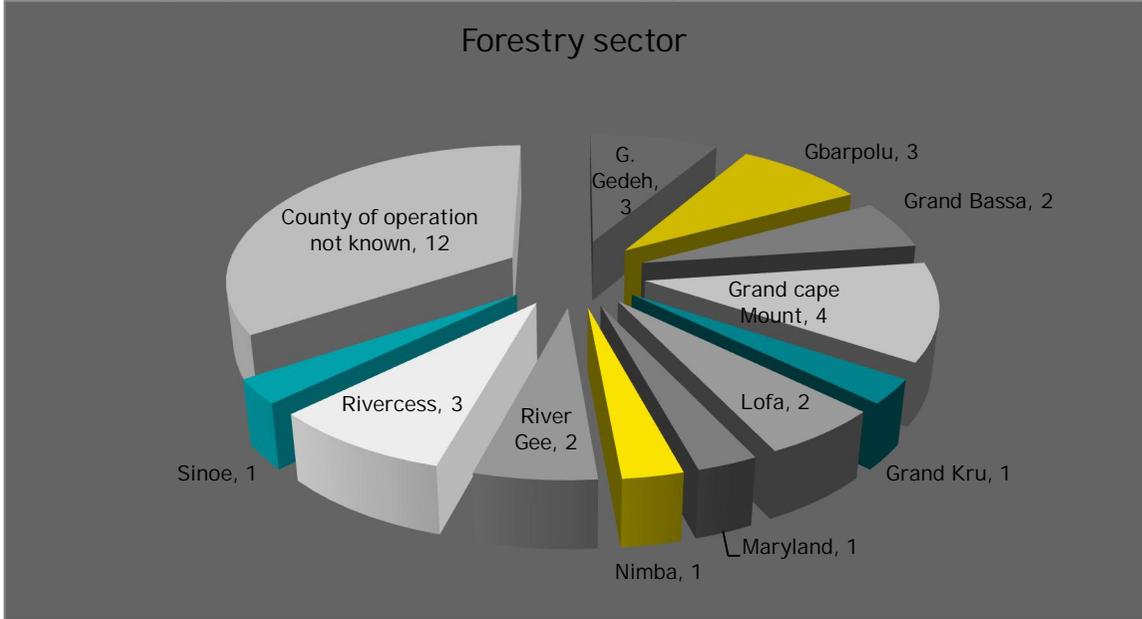

Chart 3: Mining companies and the counties within which they operate

* There were thirteen (13) mining companies whose counties of operation were not known at the time of writing. These are Earthcons Inc., Alex Stewart (Assayers) Ltd., Mining and Geotechnical Ltd, Elephant Fall Mining Company, Nimba Mining Company, Handin Resources Investment Corp., Han-Uman Company, White Rock and Liberia-Minerals Resources. The others are Madansu's Inc. Gryphon Minerals, South East Resources and Madas Corporation.

Background, Objectives, Scope, Methodology and Materiality Threshold

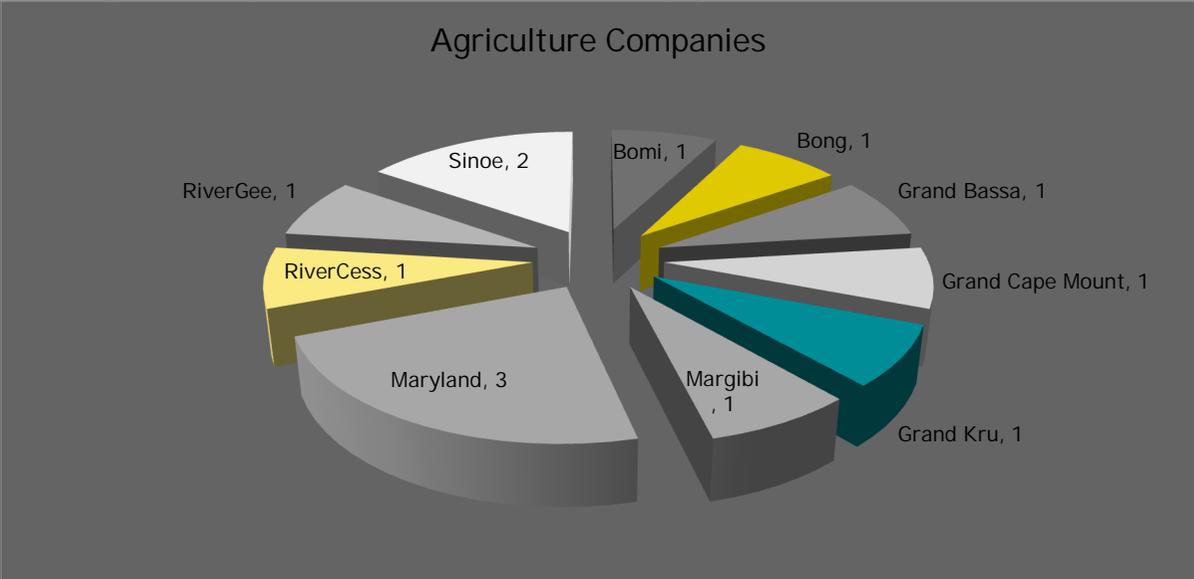

Chart 4: Forestry companies and the counties within which they operate

*...The location of twelve (12) forestry companies could not be determined. These companies were Forest Venture, Global Logging, Tropical Timber, Universal Forestry, Eco-Timber, Timber Liberia, K-Mark Indo, Nature Oriented, Cavalla Logging, Frank Brooks, Quantum Resource and Buchanan Renewable Energy.

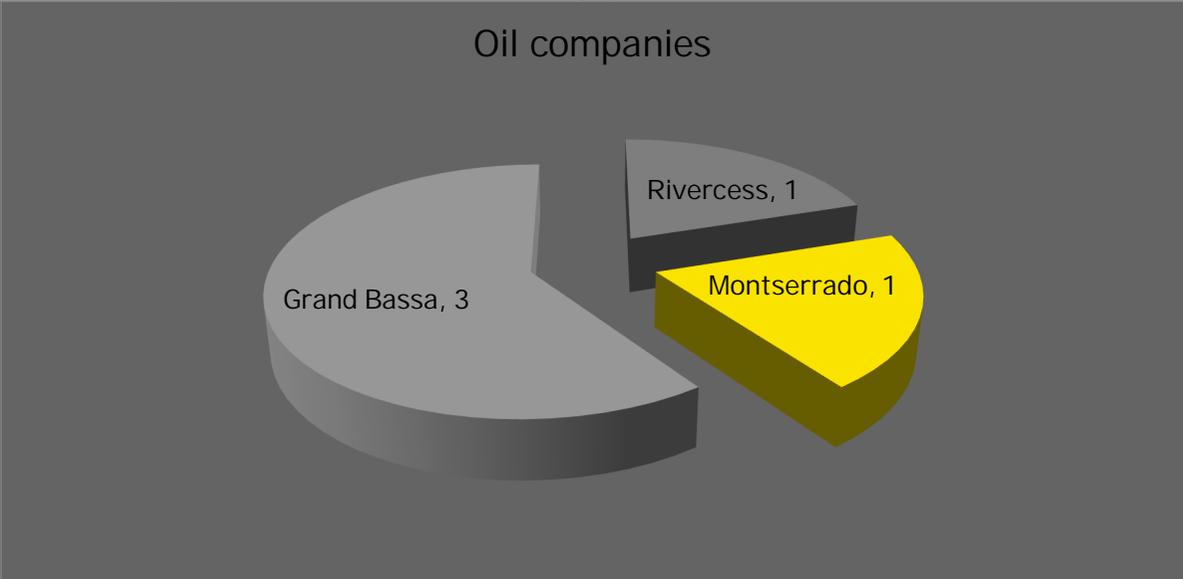

Background, Objectives, Scope, Methodology and Materiality Threshold

Chart 5: Agriculture companies and the counties within which they operate

Background, Objectives, Scope, Methodology and Materiality Threshold

Chart 6: Oil companies and the counties within which they operate

Background, Objectives, Scope, Methodology and Materiality Threshold

A summary of the economic footprint of the extractive companies in Liberia, as obtained directly from the companies is presented in table 13 below.

The information provided by the companies was incomplete and inadequate. We therefore were unable to undertake any meaningful analysis of it.

Table 13: Companies' employment, production areas, exports and total revenue

No.	Company	Sector	Areas/region of production	Total employees	Total Liberia employees	Value of total exports	Total revenue - 2011/2012
1	Cavalla	Agriculture	Maryland	1,240	1232	11,387,538	32,593,925

Background, Objectives, Scope, Methodology and Materiality Threshold

vi. Central Government and reporting Agencies

The 5th Report also attempted to capture the relationship that exists between the Government and each of the other reporting Agencies, apart from the MoF with regards to the extractive industry. During the fieldwork we wrote formally to the Agencies involved to provide us with statistics and other information to enable us meet the reporting requirements. Letters were therefore sent to the Heads of the Agencies listed in table 14 below.

Table 14: Agencies letters were sent to

No	Name of Agency
1	Ministry of Finance
2	Ministry of Lands, Mines and Energy
3	Ministry of Agriculture
4	Forestry Development Authority
5	National Oil Company of Liberia
6	National Port Authority
7	Environmental Protection Agency
8	Liberia Civil Aviation Authority
9	Liberia Maritime Authority

A number of the Heads of these Agencies were particularly open and receptive towards the process and even at rather short notice met with us and designated appropriate personnel to help provide us with the information. Particular mention is made of the Head of EPA, the Minister for Labour and the Comptroller of the National Port Authority. Others such as the LCAA and the Finance Director of the Liberia Maritime Authority could not meet with us but ensured that they provided us with the responses they could under the circumstances.

Responses showed that generally, apart from the four main sector agencies, that is, Ministry of Agriculture, Forestry Development Authority, Ministry of Lands, Mines and Energy and National Oil Company of Liberia, all other Agencies provide services to and receive revenue from all companies and organisations regardless of their sectors of operation.

vii. Beneficial ownership

None of the Agencies that responded had any loans or guarantees provided by them to any extractive company. There was also no report of any level of beneficial ownership by government of any company in the extractive industry. There is provision, however in the Petroleum Law of Liberia for NOCAL to undertake and/or facilitate the exploration and establishment of the country's liquid and gaseous hydrocarbons deposits, both on land and in the country's sovereign waters. All agreements and arrangements entered into by NOCAL require the final approval of the President of Liberia.

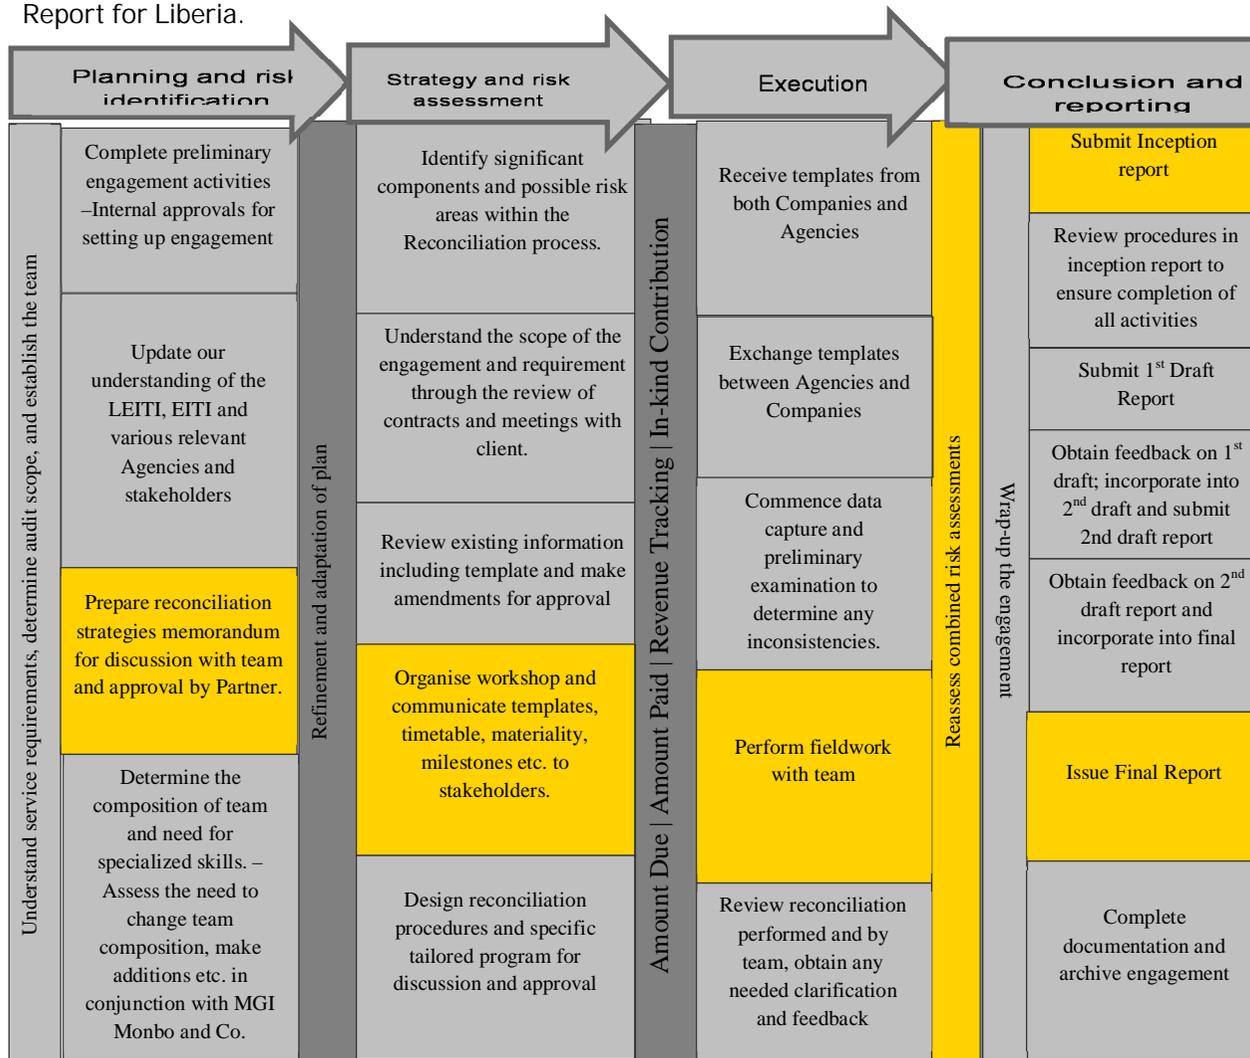

Details of responses received by individual Agencies are shown in Appendix C.

Background, Objectives, Scope, Methodology and Materiality Threshold

Scope and Methodology

Among the objectives of the LEITI as stated in Section 3.2 (b) of the LEITI Act of 2009, is the requirement for “all Companies engaged in the extraction of agriculture, forest and mineral resources in Liberia to join the LEITI”. The scope of the 5th EITI Report for Liberia is therefore a reconciliation of revenue from all Companies in the extractive sector and tracking of the use of that revenue by the Government of Liberia for the period 1 July 2011 to 30 June 2012.

We have presented below the four (4) phases of our methodology tailored to the 5th EITI Reconciliation Report for Liberia.

Background, Objectives, Scope, Methodology and Materiality Threshold

Reconciliation Process

Tracing payments as recorded on company templates and supporting schedules to flag receipts continued to be a key part of our reconciliation procedure. A number of companies had made payments to Agencies, other than the Ministry of Finance, for which flag receipts were not issued and we did not include such payments in arriving at final amounts paid by companies. Instead, we isolated such payments and disclosed them separately in the report. Payment reconciliation therefore took two forms. Firstly payments made for which flag receipts were issued were reconciled to the Ministry of Finance receipts per their templates. Secondly payments made to all other Agencies, for which flag receipts were not issued were traced to relevant Agencies' templates where possible but not reconciled.

As per our methodology for the 4th Report, where the Ministry of Finance reported a higher amount than a reporting Company and those amounts were all traced to flag receipts in the MoF database, we adjusted the Company's amounts to agree with those of the Agency after consultation with the companies.

Where the Company's payments were higher and supported with flag receipts, we traced the receipts to the MoF database and when found, we adjusted the MoF's figures accordingly. However where the Company's stated payment was higher than that of the MoF and we could not trace those payments to flag receipts in the MoF database we adjusted them to agree with the MoF's stated amount after consultation with the companies.

We shared the companies' templates with MoF and the other Agencies and we also shared the MoF and other Agencies' templates with the companies. We contacted the companies and the MoF with information on adjustments to be passed and passed them with the consent of the parties involved.

For ease of comparison and presentation, we converted all Liberian Dollar amounts to United States Dollars using a rate of LD72.87/US\$1 being the average selling rate for the 2011/ 2012 tax period per the 2011 and 2012 Central Bank of Liberia Annual Reports covering 1 January to 31 December.

Background, Objectives, Scope, Methodology and Materiality Threshold

Materiality Threshold

The materiality threshold for the 4th EITI Report for Liberia was guided by Requirement 9 in the revised EITI Standards of 2011. That was however replaced by Requirement 4 of the EITI Standard adopted at the Global Conference held in Sydney, Australia and the EITI International Secretariat's publication on 11 July 2013. This requires the MSG, beforehand, to establish appropriate materiality definitions and thresholds for its reconciliation report. The LEITI Secretariat, therefore, based on information contained in the 4th Reconciliation Report, reviewed each revenue stream, sector and company data to provide analysis and recommendation for the establishment of materiality thresholds to be used in the 5th Reconciliation Report.

The LEITI considered a payment or revenue stream as material where its exclusion or misstatement would significantly affect the final EITI report. Using the 4th Reconciliation Report as a base, the revised materiality thresholds for this 5th Report are shown in table below:

Table 15: Materiality thresholds

Sector	2011/2012 Amount (US\$)	2010/2011 Amount (US\$)
Forestry	5,000	10,000
Mining	50,000	15,000
Agriculture	50,000	30,000
Oil	350,000	200,000

We relied on these thresholds for our work. For small scale operators, particularly in the mining and forestry sectors that made payments to Government Agencies we did not obtain any templates from them. The Government Agencies however consolidated the receipts from them and reported in bulk. We therefore did not reconcile these small scale operators' payments and have shown them separately as Consolidated Class "B" licenses, Consolidated Gold Dealers' licenses, Consolidated Prospecting licenses, Consolidated Class "C" licenses and Pit Sawyers totaling US\$825,129. Companies for which total payments on templates submitted by both the Agency and the Company fell below the sector materiality threshold were also not reconciled.

Background, Objectives, Scope, Methodology and Materiality Threshold

The table below shows categorization of the various companies into “within” or “below” the threshold for each sector.

Table 16: Company categorization by threshold limits

Companies within threshold limit		Companies below threshold limit	
Agriculture Sector	Mining Sector	Forestry Sector	Mining Sector (Cont'd)
Cavalla Rubber	Western Cluster Limited	International Consultant Capital	Ironbird Resources Incorporated
Firestone	Arcelor Mittal Liberia China Union Investment (Liberia) Bong Mines Company Limited	Liberia Hard Wood Corporation	BAO CHICO Resources Liberia Limited (China Henan International Cooperation Group Co. Ltd.)

2. Amount Due
3. Amount Paid
4. Revenue Tracking
5. In-kind Contribution

Details of Key Observations

General response

As per the 4th Report, we obtained a list of extractive companies from the LEITI Secretariat for this 5th Report and used it as a guide in assessing the rate of template submission. The LEITI Secretariat reiterated that certain companies may make payments to and be reported upon by the Ministry of Finance but may not appear on its (LEITI Secretariat) list, because LEITI Secretariat compiled its list based on data obtained from the various Sector Agencies. These Agencies recognise companies with operating licences only, whilst the MoF may receive payment and report on companies based on their business registration certificates. Thus in our summary presentation of payments per company in table 34 to 37, we categorised the companies into “companies within threshold limit”, “companies below threshold limit” and “companies not in LEITI database.”

The number of extractive companies that participated in the 5th report increased by 33% from 111 companies in the 4th report to 148 companies.

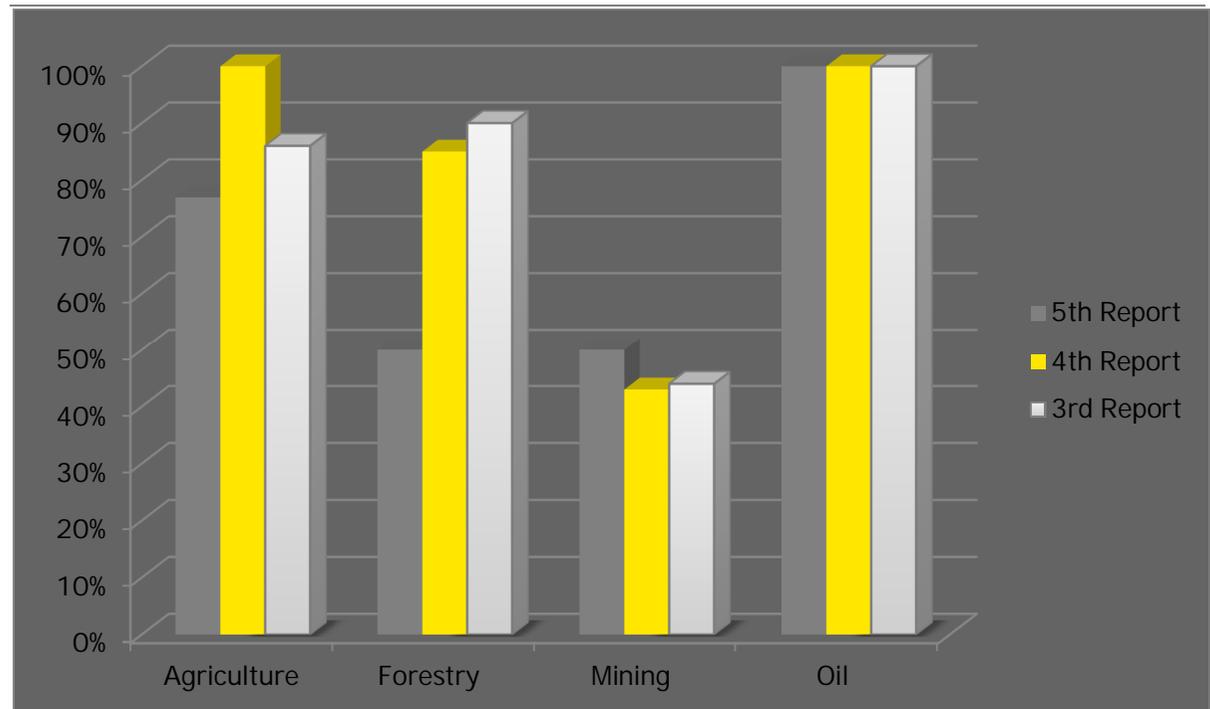

In all a total of 80 extractive companies submitted templates for the 5th EITI Report for Liberia. This equated to 54% submission rate compared to the total number of companies for which the Agencies submitted templates for the 2011/2012 financial year. The submission rate decreased by 5% percentage points as compared to that of the 4th Report which saw 65 companies out of 111 reporting, that is 59%. A breakdown of response per Sector over the past three (3) Reports is shown in table 17 and graph 1 below:

Details of Key Observations

Table17: Template submissions per sector for Third, Fourth and Fifth reports

Report	5th report			4th report			3rd report		
	Submitted	Total	Percentage	Submitted	Total	Percentage	Submitted	Total	Percentage
Agriculture	10	13	77%	11	11	100%	12	14	86%
Forestry	14	28	50%	17	20	85%	19	21	90%
Mining	51	102	50%	32	75	43%	34	78	44%
Oil	5	5	100%	5	5	100%	6	6	100%
Total	80	148	54%	65	111	59%	71	119	60%

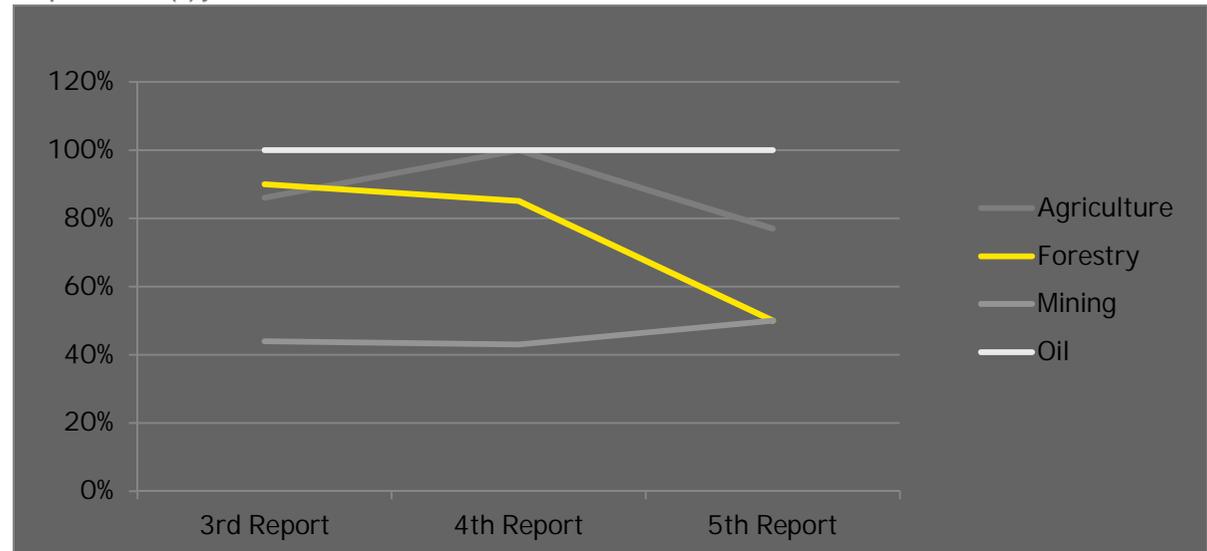

Graph 1: Template submission rate for 5th, 4th and 3rd reports

Details of Key Observations

Over the last three reports, the Oil sector has maintained a 100% submission rate. The Mining sector experienced an increase in submission rate while both the Forestry and Agriculture sectors experienced drops in submission rates in the 5th report. The Mining sector particularly saw a 7 percentage point jump from 43% in the 4th report to 50% in the 5th. Forestry experienced the lowest submission rate of 50% in the current reporting period as compared to the two previous reporting periods. The Agriculture sector is unstable with submission. The sector saw an increase of 14 percentage point from the 3rd reporting process to the 4th but dropped by 23 percentage points from the 4th to the 5th. This is illustrated graph 2 below:

Graph 2: Three (3) year submission rate

Out of the twenty-eight (28) forestry companies participating in the current reporting process, seven (7) were below the sector threshold. They were therefore not required to submit templates. However, two of such companies did submit templates. Nine (9) of the forestry sector companies, which were above the threshold failed to submit templates. The companies involved are listed in table 18 below.

For the Agriculture sector, three (3) companies, The Liberia Company (LIBCO), Lee Group of Enterprises and Equitorial Palm, were considered registered businesses not directly engaged in the extractive activities thus not required to submit templates.

Details of Key Observations

A total of twenty-two (24) companies, that is 16% of the extractive industry, did not submit templates for the 5th Report. This is a reduction by 25 percentage points on the 4th Report. A listing of these companies is shown in table 18 below:

Table 18 List of companies that did not submit templates

No	Name	Sector
1	Southern Cross Investment Limited	Mining
2	Konblo Bumi Incorporated	Mining
3	Investment Development Corporation	Mining
4	Ascension Resources Corporation	Mining
5	Jamu Resources Incorporated	Mining
6	Thackett Mining Incorporated	Mining
7	Liberia Development Initiative	Mining
8	Shankil Resources (Liberia) Inc.	Mining
9	Royal Company	Mining
10	Golden Mass Trading	Mining
11	Golden Vision Trading	Mining
12	Afric Diam Company Inc.	Mining
13	Trans-Atlantic Petroleum & Oil Resources	Mining
14	West Africa Gold and Diamond Inc.	Mining
15	Diamco Inc.	Mining
16	Forest Venture	Forestry
17	Global Logging	Forestry
18	Tropical Timber Inc.	Forestry
19	Universal Forestry Corp.	Forestry
20	Eco-Timber Liberia	Forestry
21	Timber Liberia	Forestry
22	K-MARK INDO	Forestry
23	Nature Oriented	Forestry
24	Buchanan Renewable Energy - Fuel	Forestry

Generally, for those companies within the materiality threshold, there appeared to be an improved level of awareness among extractive companies of their reporting responsibilities with regards to the LEITI and willingness to cooperate and communicate with us during the reconciliation process. We invited a number of companies to the LEITI Secretariat to assist us during the fieldwork work while others were called on the telephone for discussion.

Government Agencies

A total of nine (9) Government Agencies involved in the EITI Report for Liberia submitted templates for the 5th Report. Two (2) agencies, that is, LCAA and MoA who did not report in the

Details of Key Observations

prior year report, submitted templates this time. The Agencies involved together with the level of submission as compared to the 4th Report is shown in table 19 below.

Table 19: Agencies involved

No	Name of Agency	Initials	2012	2011
1	Ministry of Finance	MoF	Yes	Yes
2	Ministry of Lands, Mines and Energy	MLME	Yes	Yes
3	Ministry of Agriculture	MoA	Yes	No
4	Forestry Development Authority	FDA	Yes	Yes
5	National Oil Company of Liberia	NOCAL	Yes	Yes
6	National Port Authority	NPA	Yes	Yes
7	Environmental Protection Agency	EPA	Yes	Yes
8	Liberia Civil Aviation Authority	LCAA	Yes	No
9	Liberia Maritime Authority	LMA	Yes	Yes

Attestation

The instructions for completing the reporting templates stated that each template must be attested to by the Taxpayer / Agency (Management sign-off) and external auditors (Auditor's Report).

The level of compliance with this directive by Government Agencies is shown in table 20 below:

Table 20 Attestation

No	Agency of Agency	GAC sign off	Head of Agency (HoA)/Authorized Signer	Sign-off
1	Ministry of Finance	No	T. Ojuku Nyenpan (At the time of writing our report he is no longer the Head of Agency) Deputy Min (Planning & Development)/	Yes
2	Ministry of Agriculture	No	Min.Mcclain	Yes
3	Forestry Development Authority	No	Kederick F. Johnson	Yes
4	National Oil Company of Liberia	No	Fulton D. Reeves	Yes
5	National Port Authority	No	Christina Kpabor Paelay	Yes
6	Environmental Protection Agency	No	John C. Jeh	Yes
7	Ministry of Lands, Mines and Energy	No	Patrick Sendolo (Minister)	Yes
8	Liberia Civil Aviation Authority	No	signature. No Name	Yes
9	Liberia Maritime Authority	No	Charles Gono	Yes

The government Agencies provided their templates in soft copy and at the time of reporting they are yet to attest the hard copies.

Details of Key Observations

As shown on table 21 below, two (2) companies submitted templates without their Heads attesting and 13 out of 80 Companies submitted templates without an external auditor's attestation.

Table 21 – Company templates not attested per sector

Sector	No of companies that submitted templates	Auditor's		Company Head	
		Not attested	Percentage	Not attested	Percentage
Forestry	14	4	29%	0	0%
Mining	51	6	13%	1	2%
Agriculture	10	3	30%	1	10%
Oil	5	0	0%	0	0%
TOTAL	80	13	18%	2	3%

The auditors of companies listed in the table 22 below did not attest their templates.

Table 22 Company templates not attested by their auditors

No	Name of Company	Sector
1	Amlib Minerals	Mining
2	BCM International (Liberia) Ltd	Mining
3	Bukon Jedeh Resources Ltd	Mining
4	China Union Investment (Liberia) Bong Mines Ltd	Mining
5	Knights Group	Mining
6	Planet minerals	Mining
7	International Consultant Capital	Forestry
8	Geblo Logging	Forestry
9	EJ & J Investment	Forestry
10	Tarpeh Timber	Forestry
11	Liberia Forest Products Inc.	Agriculture
12	Libinc Oil Palm Inc.	Agriculture
13	Sime Darby	Agriculture

Also companies whose heads did not attest their templates were as follows:

Table23: Company templates not attested by company head

No	Name of Company	Sector
1	Knights Group	Mining
2	Sime Darby	Agriculture

Details of Key Observations

We noted that templates from the following companies bore only signatures of their Company Heads without his/her name, as specified in the instructions:

Table 24: Companies with signatures but not names of the head

No	Name of Company	Remarks	Sector
1	Acquarian Commercial Holding Inc	Signature, no name	Mining
2	Amlib Minerals	Signature no name	Mining
3	BG Minerals	Signature no name	Mining
4	China Union Investment (Liberia) Bong Mines Ltd	Signature, no name	Mining
5	Global Mineral Investment	Signature, no name	Mining

16	Bargor & Bargor Ent., Inc	Signature, no name	Forestry
17	B & V Timber Company	Signature, no name	Forestry
18	EJ & J Investment	Signature, no name	Forestry

Details of Key Observations

Amount Due

The purpose of this section is to ascertain the fixed element of amounts to be paid by the extractive Companies to the Government of Liberia through the various government Agencies.

For this report, Companies were required to disclose “amounts due” for all tax codes for the period under review and the Agencies were also required to state amounts due from the various Companies.

The fixed elements considered are both sector and non-sector specific. The following are non-sector specific but applicable if stated in the concession of the companies:

- ▶ Signature fee/signing bonus;
- ▶ Contribution via GoL to University departments (UL, etc.); and
- ▶ Annual social contribution (county & community).

The others are general annual payments required by Liberian laws. These are:

- ▶ Business registration fee;
- ▶ operational/professional license fees; and
- ▶ Article of incorporation.

Payment for article of incorporation is required for newly registered companies in any given year.

Details of sector specific fixed elements are captured under the sectorial analysis section.

Activities

In carrying out our work we processed data received from all parties and examined all submissions from the reporting stakeholders to determine whether the report of the government and the individual Companies are in agreement or have any inconsistencies.

As part of the process, we obtained and reviewed contracts in order to extract the fixed elements of amounts due figures for Companies in all four sectors. We also held discussions with representatives from the SGS, MLME as well as the LEITI secretariat and also corresponded with the FDA and NOCAL.

Details of Key Observations

We also referred to the websites of the following institutions and Agencies:

1. LEITI Secretariat, <http://www.leiti.org.lr> for the database on extractive companies as well as companies' concession contracts;
2. NOCAL, <http://www.nocal.com.lr/operations/block-status> for the status of leased and open blocks; and
3. The mining cadastre at MLME. See appendix H for the Mineral Property Map of Liberia.

Total Amount Due

From our review, a total of US\$31,566,868 was due to be paid by the companies to the Government in the fiscal year 2011/2012.

The Companies however disclosed US\$33,030,421 as the amounts due while the Agencies disclosed US\$17,627,411. This is shown per sector in table 25 below.

Table 25: Total amount due

	Amount Disclosed by Company	Amount Disclosed by Agency	Reconciler Computed Amount	Amount Paid	Over/(Under) Payment
	A	B	C	D	E=D-C
	US\$	US\$	US\$	US\$	US\$
Agricultural Sector	-	-	-	-	-
Forestry Sector	30,995	1,377,034	13,216,145	1,991,311	(11,224,834)
Mining Sector	27,549,499	16,250,376	12,518,068	40,720,969	28,202,902
Oil Sector	5,449,927	-	5,854,681	8,041,547	2,186,866
Total	33,030,421	17,627,411	31,588,894	50,753,827	19,164,934

The large differences between amounts due disclosed by the Company and those of Agencies mainly resulted because some tax codes were classified differently by Companies and Agencies. Also amounts due were completely omitted by some Companies as well as Agencies.

Sectorial Analysis

Agriculture Sector

All the fees stated in the contracts with the companies in the agricultural sector are variable. Thus no amounts due were determined for companies in the sector.

Details of Key Observations

Forestry sector

As per the FDA's Ten Core Regulations, there are three (3) main categories of fees to be paid by the Companies. These three fee categories, their components and whether or not they are being considered in this report are presented in table 26 below.

Table 26: Forestry sector fee categories and applicability

Fee	Components	Category	Applicable/Not applicable	Note
Land rental fees	Area fee	Fixed	Applicable	
	Contract administration fee	Fixed	Applicable	
	Surface rental/Bid premium	Fixed	Applicable	
Forest product fees	Sawmill permits	Fixed	Not applicable	1

Source: Forestry Development Authority Ten Core Regulations. Regulation number 107-07.

Note 1

Sawmill operators are classified into three (3) categories. These are Class A, B and C. Class A operators are those persons who process 1500 cubic metres of wood per year and are required to pay US\$2,500 per annum.

Class B operators are those persons who process 750 cubic metres of wood but less than 1500 and are to pay US\$1,000 annually and Class C operators process less than 750 cubic metres of wood per year and are to pay US\$750 for the permit.

In the light of the above, we need to ascertain the category of permits granted to each Company of person in order to derive the amount due.

Although this fee appears to be fixed, from the foregoing, it is evident that in order for us to reliably ascertain the amounts due to be paid by the Companies, information regarding the class held by an operator needs to be obtained and validated. This was not available at the time of reporting hence our inability to consider this element in our report.

The applicable fees are further explained below:

1. Land Rental fees

1.1. Area fee

The Regulation requires FMC holders to pay US\$2.5 per hectare of land to be harvested and TSC holders to pay US\$1.25 per hectare. FMCs are defined as covering a land area of between 50,000 and 400,000 hectares and TSCs as contracts not exceeding three (3) years.

Based on the above, we assumed that all contracts covering land areas less than 50,000 hectares are TSCs and those ranging between 50,000 and 400,000 are FMCs regardless of the duration of the contract.

Details of Key Observations

1.2. Contract administration fee

Per section 32 of the FDA Ten Core Regulation, an annual fee of between US\$500 and US\$1000 is to be paid per contract. For a contract with fewer than 120 days remaining within the year, no fee is required to be paid. For a contract with at least 120 days but fewer than 240 days remaining within the year, US\$500 should be paid and for a contract with 240 or more days remaining within the year, a US\$1000 is required to be paid.

In the year under consideration, all the contracts reviewed had more than 240 days to expiry thus US\$1,000 was due as contract administration fee.

Land Rental Bids/Bid Premium

In addition to the Land Rental Fees contained in the FDA Ten Core Regulations, we noted in our review of individual contracts that the Companies are required to make specific fixed annual payments based on the bids provided in the contracts in the bid opening ceremony multiplied by the surface area in hectares of the contract area. This is referred to in the contracts as Land Rental Bids but on the Templates presented by the Companies and the Agencies as Bid Premium. It is also sometimes paid and reported by the Companies and the Agencies as Surface Rental. We therefore included this fee as part of our work.

On the basis of the foregoing, a summary of the amounts due by Companies in the Forestry sector are set out in Table 27 on the next page.

Details of Key Observations

Table 27: Summary by company- Forestry sector

	Name of Company		Amount Disclosed by Company	Amount Disclosed by Agency	Reconciler Computed Amount	Amount Paid	Over/(Under) Payment	Comments

Details of Key Observations

Detailed line items and individual Companies' templates are also set out in appendix D.

Mining Sector

Under the mining sector, the following tax kinds are named in the individual concessions:

Social contribution

Mineral development and research fund

Contribution via GoL to University departments

Scientific research fund

Surface rental

License fees

Details of Key Observations

The amounts required to be paid by the companies are specifically stated in each company's concession agreement and are normally fixed. However, there were some instances where amounts vary depending on whether the company is at a stage where it has started commercial production. In such instances we assumed commercial production has not yet begun. A summary of amounts due from companies in the mining sector is shown in table 28 below:

Table 28: Summary by company- Mining sector

S/N	Name of Company	TIN	Amount Disclosed by Company	Amount Disclosed by Agency	Reconciler Computed Amount	Amount Paid	Over/(Under) Payment	Comments
			A	B	C	D	E=D-C	
			US\$	US\$	US\$	US\$	US\$	
1	Western Cluster Limited	426822008	25,000,000	12,500,892	2,800,958	26,850,958	24,050,000	The company paid US\$25m signing fee.
2	Arcelor Mittal Liberia	404633007	100,000	400,000	3,500,958	3,400,958	(100,000)	Annual training and contribution to UL not paid.
3	China Union Investment (Liberia) Bong Mines Company Limited	415979002	301,000	216,667	3,950,958	6,235,063	2,284,105	Company annual social contribution of US\$5.9m in the year whiles US\$3.5m was the amount due.
4	BHP Billiton (Liberia) Incorporated	404839004/ 424682004	-	50,900	450,958	450,958	-	
5	Putu Iron Mining Company	408335019	1,400,000	1,350,000	1,705,958	1,900,958	195,000	The company paid more in contribution to UL and other taxes than determined by us. This could be due to payment of arrears or requirements of other exploration contracts not available to us.
6	Amlib United Minerals Incorporated	400777004	228,174	221,167	6,888	227,107	220,219	Company paid US\$226k for surface rental. This maybe back pay or our inability to determine the correct amount due to the unavailability of all of its exploration contracts for review.
7	Bea Mountain Mining Corporation	404492004	-	-	958	201,405	200,448	Contract not available for review

Details of Key Observations

Oil sector

The type of fees within the oil and gas sector, their category and applicability to our report is shown in table 29 below.

Table 29: Oil sector fee categories and applicability

<i>Fee</i>	<i>Category</i>	<i>Applicable/Not applicable</i>
Surface rental	Variable	Not applicable
Bonuses	Variable	Not applicable
Income tax	Variable	Not applicable
Social and welfare contribution	Fixed	Applicable
Hydrocarbon development	Fixed	Applicable
Contribution via GOL to University of Liberia	Fixed	Applicable
Rural energy fund (REFUND)	Fixed	Applicable
Personnel training	Fixed	Applicable

1. Social and welfare contribution, Hydrocarbon development, Contribution via GOL to UL, Rural Energy Fund (REFUND) and Personnel and Training

The required amount to be paid for these tax lines vary per contract and are all dependent on the stage of development; whether exploration or exploitation. These are thus fixed and all oil Companies are assumed to be at exploration stage of the development of the oil fields.

Details of Key Observations

A summary of the amounts due by Companies in the Oil sector are set out in Table 27 below:

Table 30: Summary by company- Oil sector

S/N	Name of Company		Amount Disclosed by Company	Amount Disclosed by Agency	Reconciler Computed Amount	Amount Paid	Over/(Under) Payment	Comments
			A	B	C	D	E=D-C	
		TIN	US\$	US\$	US\$	US\$	US\$	
1	African Petroleum/European Hydrocarbons Limited	500034688/ 426261006	550,000	-	1,115,029	1,336,137	221,107	The company paid more for contribution to UL than expected. This could as a result of arrears payment

	Broadway Peppercoast	403781002	-	-	515,958	449,708	(66,250)	
5	NOCAL	404154001	-	-	-	1,353,629	1,353,629	Contract not available to determine NOCAL's tax and social obligations
	Total		5,449,927	-	5,854,681	8,041,547	2,186,866	

The details of the individual tax lines and the Companies' data can be found in appendices 2 and 4.

Details of Key Observations

Companies that failed to disclose amounts due

During the review of templates submitted by both Agencies and Companies, we noted that the following companies and Agency failed to disclose the amounts due on the templates submitted:

Table 31: Companies that did not disclose amounts due on templates submitted

Agriculture Sector	Forestry Sector	Mining Sector
Cavalla Rubber	Geblo Logging	BHP Billiton (Liberia) Incorporated
Golden Veroleum	Sun Yeun	Bea Mountain Mining Corporation
Liberia Agricultural Company	Alpha Logging	Birimian Gold Limited
Maryland Oil Palm Plantation	E. J & J Investment / Mandra Forestry	Middle Island Resources Liberia Limited
	Tarpeh Timber	African Gold (Gold) Mining Liberia Limited
Oil Sector	Atlantic Resources	Belle Resources
NOCAL	Bassa Logging Company	Acquarian Commercial Holdings Inc.
	International Consultant Capital	Aforo Resources/Indo Gold Ltd
	Euro Logging	Bopulu Commercial Ltd
		Planet Mines and Minerals Limited
		Voila International Inc.
		West African Resources (Lib) Corp. Limited
		Winestock Development Liberia Corporation

For all of the Oil companies, the MoF failed to disclose the amounts due on the templates submitted.

Details of Key Observations

Companies for which we could not obtain contracts for review

As mentioned on page 42 under “Activities”, we relied on the individual concessions contracts between the government and the companies in determining amounts due. However, not all contracts were made available for our review. Table 32 below sets out the companies for which we could not obtain the individual contracts for our work.

Table 32: Companies for which there were no contracts available for review

SN	Name of Company	Sector	SN	Name of Company	Sector
1	Ecotimbers	Forestry	23	African Gold (Gold) Mining Liberia Limited	Mining

Details of Key Observations

Amount paid

The Ministry of Finance and other Agencies reported a total receipt of US\$110,146,657 from the extractive industry during the 2011/2012 financial year while the companies reported a total payment of US\$100,809,819 to the MoF. This resulted in an unreconciled net difference of US\$9,336,838. The unreconciled Small Scale Miners and Pit Sawyers amount of US\$825,129, and the unreconciled difference of US\$87,113 for companies below the threshold and others, that, though within the threshold were classified as registered businesses only, thus not reconciled, when subtracted from the difference of US\$9,336,838, gives a net difference of US\$1,925,394. This represents about 2% of receipts by the MoF. The net difference mainly related from the Forestry and Mining Sectors.

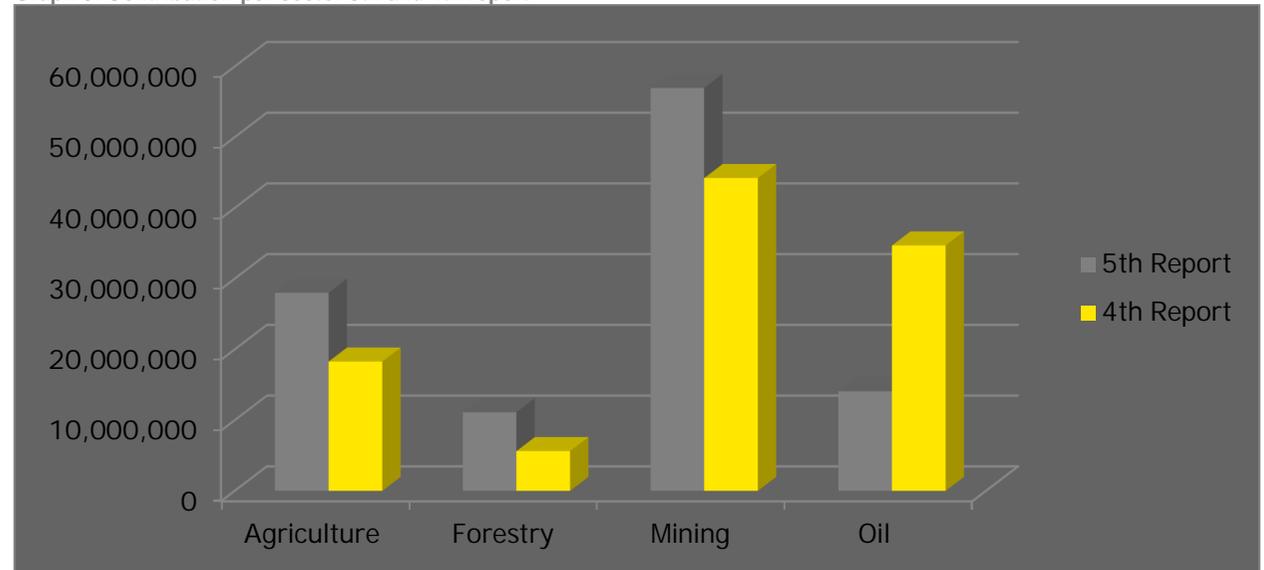

Compared to prior year, total payments received from the extractive companies increased by about US\$7,344,090, which is 7%. The Mining sector made the highest contribution this year with 52% of the total payments, followed by the Agriculture, Oil and Forestry sectors with 25%, 13% and 10% respectively. Contributions by the Agriculture Forestry and Mining sectors rose by 53%, 98% and 29% respectively compared to prior year while the Oil sector saw a reduction in contribution by 59% after the US\$15m double count in the Chevron/Oranto signing fees payments were adjusted for. The significant reduction in the Oil sector payments is due to sign-on fees paid by Chevron for Oranto in the prior year, withholding taxes recorded for Chevron in prior year and reduction in payments from Oranto compared to prior year. Payments analyses per sector over 2010/2011 and 2011/2012 financial years are shown in table 33 and graph 3 below:

Table 33: Total payment and differences per sector FY 2011/2012 & 2010/2011

Details of Key Observations

We provide a further breakdown of payments in tables 34 to 37 below showing the following:

- Name of the Company;
- TIN;
- Original amount reported by the Company and Agency with the difference arising;
- Adjustment of the Company and Agency figures;
- Final amount of the Company and Agency and difference arising.

Table 34: Summary by company – Agriculture sector

Details of Key Observations

Payment to other Agencies

It became clear from the workshop that kick started the 5th Report that apart from payments to the MoF, reconciliation of funds paid to other Agencies could not be possible. None of them issued flag receipts and some of them such as the NPA, EPA and LCAA received payments for all users of their facilities regardless of their operating sectors. As a result, identifying and isolating extractive industry receipts was not feasible. We therefore agreed that these amounts would only be disclosed for information purposes. The total amount paid to those Agencies was US\$2,513,795. This is made up of amounts reported on their templates as paid to those other Agencies as well as amounts reported by the Agencies as received from companies. It must be noted that some of the amounts reported by the companies were not reflected on the Agencies' templates and vice versa. We disclose in table 38 below payments to these other Agencies.

Table 38: Details of payments to other agencies

Details of Key Observations

Revenue tracking

As per the Public Financial Management Act of 2009 of the Republic of Liberia, “the balances of all the public funds of the Republic of Liberia are to be included in the Consolidated Fund under the oversight of the Legislature and managed and executed by the Minister, save for exceptions granted under Section 28.5 of this Act. The Minister has the authority to manage the Consolidated Fund to allow for an effective and efficient cash management”. The contributions by the Companies therefore lose their identity once they are deposited into the consolidated fund. Their use can therefore not be tracked to public investment/expenditure or to expenditure units/cost centres or projects.

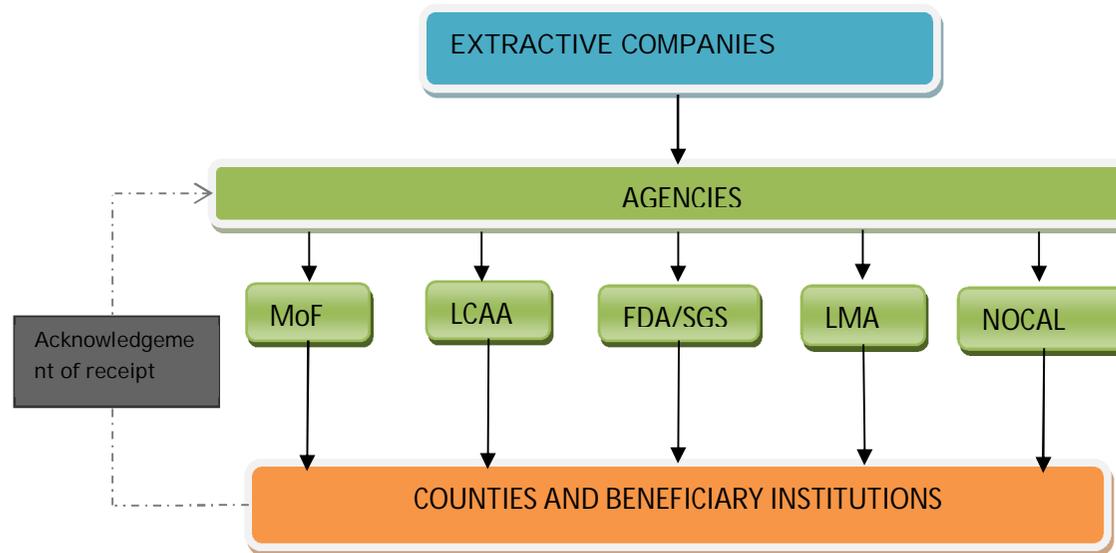

However, a number of extractive industry contracts and agreements include clauses requiring holders to make contributions towards specific objectives such as annual social contributions, contributions towards education/scholarships and sector development. This revenue tracking section attempts to map the flow of revenue from the extractive companies where it originates, through the various collecting agencies to the beneficial institutions or the Government of Liberia consolidated fund. Specific procedures performed per the ToR included the following:

- A mapping exercise of the flow of revenue from the Extractive Industries/Companies to Government Agencies or special accounts and the national consolidated revenue account.
- Design a revenue tracking template for line ministries and Agencies at different stages of the value chain – flow of funds.
- A mapping of the flow of revenues from line ministries and Agencies and the budget and other special accounts to expenditure units/cost centres or projects.
- Review the extent to which revenue from the extractive industry can be linked to public investments/expenditures.
- Identify areas in which reconciliation is feasible, i.e. there is perfect symmetry between the paying and receiving entities, and areas in which only a unilateral disclosure by the receiving or disbursing entity is necessary.

Diagram 1 below illustrates the flow of revenue from the extractive Companies to Government Agencies and onward disbursement by Agencies to beneficiaries.

Details of Key Observations

Diagram 1 – flow of funds

Payments are made by the Companies to various Government Agencies. The Social Development Fund (SDF) office at the MoF receives funds from the Agencies and Companies for disbursement to the beneficiary counties for social development. The SDF office ascertains the expected receipts from the Companies based on the terms of their concession contracts. It is thus able to compare actual receipts to expected receipts from the extractive Companies. The same concession contracts determine how much funds are disbursed to beneficiary counties. Disbursements are made through cheque payments written in the names of the beneficiary counties. We sighted photocopies of cheques made out in the name of the Counties and photocopies of ID cards of County representatives who received the cheques. We were informed at the SDF office that some of the counties have not fully accessed their entitled funds. According to the Director at the County Financial Management office, the application process requires, among others, a report on how previous funds were utilised. Some of the counties are either not able provide a breakdown of funds utilisation or not aware of the procedures. We formally wrote to the Ministry of Internal Affairs (MIA) to authorise the country representatives to

Details of Key Observations

independently confirm to us the amounts received during the year under review but we received no response to our request. The MIA however sent us a schedule detailing Social Benefit Funds paid out by various extractive companies and amounts received thereof by beneficiary counties.

The total amount paid under revenue tracking, per the records of the extractive companies during the year was US\$18,755,710 while the Agencies reported receipts of US\$18,944,946 resulting in a difference of US\$189,236. This is shown in table 39 below.

Table 39: Summary of social and other contributions

Payments by Companies	Receipts by Agencies	Difference	Disbursed by Agencies	Difference
18,755,710	18,944,946	189,236	16,611,667	2,333,279

The difference resulted between NOCAL who reported payments of US\$1,160,763.78 and the MoF who reported receiving US\$1,350,000 from them. Of the amount received by Agencies and beneficiaries of US\$18,944,946, a total of US\$16,611,666.67 was disbursed leaving an outstanding amount of US\$2,333,279.33. Details of payments by the Companies, the receiving Agencies and subsequent beneficiary counties and institutions are shown in table 40 below:

Details of Key Observations

China Union contributed the highest amount to the Social Development fund with 32% of the total, followed by Arcelor Mittal, Elinito/Western Cluster and Chevron with 17%, 11% and 9% respectively. Compared to the 2010/2011 financial year, China Union's saw the highest increment by contributing 66% more funds this year. The proportion of contribution per company as well as changes in the levels of their contribution between the current report and the 4th Report are shown in table 41 and chart 4 below:

Table 41 Contribution by companies – 5th and 4th Reports

Company	5th report	4th report	% contribution	Change

Graph 4 Contribution by companies for 5th and 4th Reports

Details of Key Observations

In-Kind contribution

As previously mentioned, no reconciliation was done for in-kind contributions. These were disclosures of direct contributions by Companies to communities for development. Companies were instructed to estimate the market value of non-cash contributions and disclose them on a separate template for inclusion in the report. However, because no reconciliation was carried out and the estimated market values were not independently validated, at its last meeting on May 28, 2014, the MSG reached a decision that it will not be appropriate to disclose the market values in the report.

Projects reported included road rehabilitation, provision of water and sanitation facilities, construction of schools and award of scholarships. We disclose below details of individual projects and activities reported by the various companies.

Mining Sector

Youth Support Services	Community and estates		Sports and labour welfare
Rubber stamps issued to local farmers			Stumps issued at cost for the company
Support to orphanage			
Various programs, sports and awards			

Challenges, Way Forward and Recommendations

1. Challenges
2. Way Forward and Recommendations

Challenges

Detailed below are the key challenges faced during the 5th reconciliation reporting process:

1. Reporting amount due continues to be a challenge for both the Companies and Agencies. Agencies continue to reproduce what the companies state instead of determining the amount themselves for companies to pay.
2. Unavailability of data from the relevant/monitoring ministries.
3. Just as it was during the 4th reporting process, the difficulty still remains of not being able to identify all the concession contracts related to the individual companies. For example, in instances where companies were taken over, changed their names or entered into joint ventures with others thus resulting in a name change, the concession contracts remain in the names of the original companies thus making it impossible to relate the concession contracts to the companies.
4. The attempt to reconcile amount due and compare same to amounts paid appear limited in nature and inadequate for any meaningful analysis because only the fixed elements are being disclosed. One is therefore unable to get the complete picture of total amount due. In some cases, payments made in arrears by the companies create the impression that the companies overpaid the government.
5. High level of bureaucracy in public institutions made it difficult to access information quickly.
6. Improper completion of the templates by some Companies and Agencies. Some companies misclassified the various tax kinds while others failed to disclose amount due completely.
7. Lack of a complete database of extractive companies increases the risk of omission and errors

Way Forward and Recommendations

1. A production audit across all sectors is still required to help determine amounts that ought to be paid so that collection is improved
2. The monitoring ministries and other Government Agencies should have a mechanism in place that facilitates a comprehensive documentation of amounts due from the Companies in any given fiscal year
3. There should be coordination between the MoF and the other agencies on taxes payable by the companies at the point of payment for there to be a successful reconciliation of amount due and a meaningful comparison of same with amount paid.
4. The LEITI Secretariat should undertake a project to have the file names of the concession contracts in its database renamed appropriately for ease of identification.
5. LEITI is encouraged to apply its sanction regime to those companies listed in tables 18, 20 to 24 for non-compliance with LEITI directives.
6. LEITI should update its database with the records of all extractive companies in Liberia by comparing notes with all the relevant government Agencies, including the MoF.
7. Common reporting software should be developed and made accessible to all Agencies and LEITI so that information can be assessed at all times by all authorized stakeholders.

Follow Up on Previous
Recommendations

Follow Up On Previous Recommendations

Detailed in the table below is the result of follow up on previous findings and the extent of their resolution and implementation

No.	Recommendation	Status	Comment
1.	<p>The exercise must commence close to the end of the period under review, in order to ensure easier access to transactions by Companies and Agencies and to make the reports relevant.</p> <p>The next reporting process should commence early in order to allow up to four (4) weeks for Companies to submit their templates to the Reconciler. Agencies should however submit their templates within the first two weeks to the GAC for attestation and then the GAC should also submit its final report by the 4th week.</p>	Partially implemented	Though attempts were made to start the process in time, it is still two (2) years after the fiscal year end.
2.	Companies and Agencies must include supporting schedules detailing breakdown of amounts and tax codes together with flag receipt numbers in both hard and soft copies in their submissions.	Partially implemented	The required schedules were provided by those companies that submitted their information before the field work for our review.
3.	There must be better communication and coordination between Government Agencies in their EITI reporting. Collecting Agencies must show a trail of amounts they collected, portions they retained and balances paid to the MoF. When Agencies make such payments in bulk they must submit schedules detailing the individual amounts that make up the total subsequently paid to MoF and support those payments with flag receipts.	Not implemented	The other Agencies only reported amounts received from the extractive companies without the necessary breakdowns.

Follow Up On Previous Recommendations

4.	In order to reduce inconsistencies and possible double counting, Companies should only report withholding taxes on employee salaries. All other withholding taxes should be excluded by the withholding Company. The MSG should consider introducing "withholding on PAYE" as a tax code on the reporting templates for Companies and Agencies to report appropriately	Not implemented	Some companies still reported withholding taxes on payments to subcontractors.
5.	Companies and Agencies should ensure that separate templates are completed for each tax payer using its unique TIN.	Implemented	Separate templates were presented by the companies for each TIN. Where TIN information was consolidated, it was clearly indicated.
6.	The MoF should define, document and enforce a naming regime for imputing data into its database. All entries should follow the regime. This will ensure that queries made for transactions return consistent and complete results leading to more accurate templates.	Partially implemented	The MoF still had problems extracting information on tax payers from its database.
7.	Final beneficiary counties and institutions should issue receipts of acknowledgment to disbursing Agencies when they receive payments. The Agencies should then include copies of such receipts as part of their supporting schedules. The SDF should contact all beneficiaries and obtain receipts for amounts disbursed in the 2010/2011 fiscal year.	Not implemented	No receipts were sighted by us to confirm the implementation of this recommendation. We however wrote to the counties to which Margibi and Grand Gedeh counties responded.
8.	The LEITI must liaise with the SDF office of the MoF to perform regular physical verification of projects	Not implemented	There was no evidence of this exercise taking place.

Follow Up On Previous Recommendations

	undertaken by beneficiaries of the Social Development Fund. This will reduce alleged instances of projects undertaken with other development funds being reported as SDF funded.		
9.	In advertising for the commencement of subsequent EITI Reports for Liberia, LEITI should not only inform all Companies in the extractive industry in general but also list all Companies registered in its database in order to make the information more direct and focused. Those Companies not on the list should also be encouraged to submit templates and register with LEITI.	Implemented	Some companies, though not in the database submitted templates for the 5 th report.
10.	Companies must ensure that they participate in the workshop/briefing organised by the reconciler to kick start the exercise. This provides the opportunity for interaction among stakeholders and for clarification of any issues at the onset. Companies that did not submit templates appeared not to have attended the workshop.	Implemented	Majority of companies with significant payments participated in the workshop.
11.	The LEITI should implement their mandate to punish Companies that do not respond and those that respond untimely to the reconciliation process. This should begin as soon as the date for submission lapses rather than at the end of the reconciliation process. Actions should be appropriately punitive in order to enhance compliance.	Implemented	Some companies were sanctioned for non-compliance. Refer to http://www.leiti.org.lr/ for details.

Reconcilers Conclusion

Conclusion

We have performed the procedures agreed with the LEITI and as contained in Appendix B of this report. Our engagement was undertaken in accordance with the International Standard on Related Services ISRS 4400 applicable to agreed-upon procedures engagements. The procedures were performed solely to assist you in reconciling the payments made by the extractive industries to the Government of Liberia to the records of the Government. This report relates only to the contribution of the extractive industry and does not cover the Government of Liberia as a whole.

On Payment Reconciliation, our report on the unreconciled net difference of US\$1,925,394 of companies within the reconciliation threshold which represents 2% of the total amount received by the Government of Liberia between 1 July 2011 and 30 June 2012 is immaterial compared to the total contribution of the extractive sector to the Government of Liberia. Nothing has come to our attention not to confirm the fact that the data is complete in relation to the total corporate presence in the relevant sectors and the integrity of the report can be assured with respect to payment reconciliation.

On Revenue Tracking, we can confirm that the various companies paid the amounts as indicated in tables 40 and 41. However, we cannot confirm that the US\$16,611,667 reached the ultimate beneficiaries as majority of the beneficiaries did not acknowledge receipt of the amounts received.

On amounts due, because of the limited nature of the components considered compared to the number of tax components paid by the companies and the significance of the matters described on pages 57 and 88, we have not been able to obtain sufficient appropriate audit evidence to confirm the completeness of the "amount due".

Appendix A: List of Scale Miners' contribution

License Category	US\$
All (Prospecting)	7,250
All Brokership Companies	57,000
All Class B licenses	300,000
All Dealership Companies	330,000
All Class C	62,700
Total	756,950

Terms of Reference (ToR)

No.	Scope
1.	Review the Reporting Templates used in preparing the fourth EITI report of Liberia and make any and all changes or modifications necessary to accommodate disaggregated reporting of payments ("amount paid" and "amount due"), revenues and in kind contribution and ensure that the ultimate LEITI Report is both comprehensive and comprehensible, and ensure that the existing Reporting Template be revised to comply with the tax code of Liberia and/or the coding system used by the Ministry of Finance.
2	Submit an inception report to the Multi-stakeholders Steering Group (MSG) within two (2) weeks of the commencement of assignment. The first draft shall be submitted within 60 days from the date of the contract signature for discussions and amendments (as necessary) and shall clearly indicate those companies whose reports are in agreement with the report of the Government, those whose reports are inconsistent with the report of the Government, and those whose reports are missing or incomplete; and submit a second draft report within 15 days of feedback from the MSG on the first draft report; and final draft report within 10 days of feedback from MSG on second draft report.
3	<p>► Consistent with guidelines provided by the Multi-stakeholder Group of LEITI and prior to submitting the Reporting Templates (to include In-kind Contribution templates and other quasi-fiscal expenditures such as public infrastructure) to the reporting stakeholders, the Administrator shall first obtain from the LEITI Multi-stakeholders Steering Group ("Group") a formal advice or notice regarding the followings:</p>
	Final approval of the Reporting Template.
	The agreed date for transmitting to and receiving completed Reporting Templates from reporting stakeholders, and any penalty for failure or delay to submit report or respond to subsequent queries.
	<p>► The Administrator shall conduct at least one workshop geared to talking-through the process of completing the templates, highlighting challenges experienced by stakeholders in completing templates for the Fourth Report, defining payment/revenue streams, and providing contact details that reporting stakeholders</p>
